

Project Demo Planning

Date	10 July 2022
Team ID	XXXXXX
Project Name	Raising Waters
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

Project Demo Planning:

A well-structured demo plan ensures that Shaik Reshma presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Highlighting the human and material toll of flash floods and the current lack of timely localized warnings.	3	Shaik Reshma
2	Local Dataset Overview	Showing the localized telemetry dataset and pre-processing pipeline for rain and cloud vectors.	4	Shaik Reshma
3	Machine Learning Architecture	Walkthrough of the pre-trained Classifier model and its specific pickle file loading logic in the backend.	5	Shaik Reshma
4	Dynamic Dashboard UI	Demonstration of the clean, color-coded safety tier (Red, Yellow, Green) warning interface on localhost.	6	Shaik Reshma
5	Real-time Feature Mapping	Live demonstration of inputting data into form fields and watching the UI instantly update with a risk level and corresponding color state change.	6	Shaik Reshma
6	Q&A and Conclusion	Answering evaluator questions and summarizing key takeaways for disaster readiness.	3	Shaik Reshma

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Present flood cost/problem with compelling data.
2	Solution Overview	Show system architecture diagram; emphasize local/offline operation.
3	Live Feature Demonstration	Enter extreme data (e.g., 200mm rain) and show Red (High Risk) state with alerts; enter low data and show Green.
4	Q&A Session	Be prepared to explain input vectors and model choice.
