

## Project Initialization and Planning Phase

|               |                |
|---------------|----------------|
| Date          | 07 July 2026   |
| Team ID       | XXXXXX         |
| Project Name  | Raising Waters |
| Maximum Marks | 3 Marks        |

### Define Problem Statements (Customer Problem Statement Template):

- > "Disaster relief coordinators cannot accurately predict localized flood risks in real time due to rapidly changing monsoon weather, delaying critical evacuation warnings."
- >

### Example:

| Problem Statement (PS) | I am (Customer)                                   | I'm trying to                          | But                                                                                                      | Because                                                                                             | Which makes me feel                                                                            |
|------------------------|---------------------------------------------------|----------------------------------------|----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| PS-1                   | A disaster relief coordinator or local authority. | Monitor multiple flood-prone regions . | Existing early-warning alert methods often fail to predict localized risks accurately or quickly enough. | The area has highly erratic, seasonal monsoon weather with rapid shifts in rainfall and visibility. | Anxious about missing an impending disaster, but determined to protect vulnerable communities. |
